- Linux(Ubuntu)

# JORDAN PARKER

WEB DEVELOPER | [GITHUB.COM/JPARK1914](https://github.com/jpark1914)

## PERSONAL EXPERIENCE

---

- Built a "Journal Entry" page, which allows the user to insert a journal entry, have it saved to a database and can be retrieved later by using Mongo, Express, React JS, and Node Js.
- By using HTML and CSS I created a website that was used on a school-wide server.
- Created a portfolio site landing page using HTML, CSS, Javascript, and Bootstrap4 languages.

## EDUCATION

---

BACHELORS OF SCIENCE • AUG. 2015 •

MIDDLE TN STATE UNIVERSITY

- Bachelor of Science in Recording Industry; concentration in Audio Production, Minor in Music Business

## TRAINING

---

### CODE CREW CODE SCHOOL:

- A six month coding bootcamp geared to teaching students fullstack development. They give course, miniature projects, practical use, and implementation of the material learned in the course. Along with that, we are also

provided with soft skills to help us collaboration, critical thinking, our creativity, and communication.

## PROFESSIONAL AFFILIATIONS

---

### CODE CONNECTIVE:

- An organization that's centered on helping other tech oriented people come together to exchange info and collaborate with one another.

### GIVE CAMP MEMPHIS:

- A volunteer event that is a weekend long, where many developers come together to create websites for charities and non-profit organizations.

### CODE ACADEMY:

- Where HTML, CSS, Javascript, and jQuery was first cultivated.
- I've built my first webpage project through Code Academy, which the source code is viewable through my GitHub.

### TEAM TREE HOUSE:

- Reinforced previous languages above and still continuously learning more languages to become Full Stack.

## EXPERIENCE

---

### SERVER – RAFFERTY'S – AUGUST 22, 2017 – PRESENT
